WORK EXPERIENCE

Self-Employed

2024-Present

Freelance Web Developer

- Designed and developed a website for the Cricket Association of Parbat using HTML, CSS, and JavaScript.
- Coordinated with clients to gather requirements and delivered responsive web design.

College Project: Online Voting System

2025-Present

Team Leader

- Led a 3-person team to develop an online voting system using Node.js, React, and MySQL.
- Designed system workflows, implemented frontend UI, and handled backend APIs.

PROJECTS

- **Website for Cricket Association of Parbat-** Developed and designed the official website for the Cricket Association of Parbat using HTML, CSS, and JavaScript. Created responsive layouts and maintained content updates to improve user experience.
- **Weather Dashboard CLI Application-** Built a command-line weather dashboard using Java and OpenWeatherMap API. Displayed live weather data and 3-day forecasts with JSON parsing and API integration.
- **Screenshot Organizer Application-** Developed a Java-based desktop application that automatically detects and organizes screenshots into a dedicated folder. Implemented a sequential naming system (e.g., screenshot1, screenshot2, etc.) to keep screenshots easily accessible.

SKILLS

- **Programming Languages** : Java, JavaScript, C, C++, C#
- **Web Technologies** : HTML, CSS, React, [Node.js](#)
- **Databases** : MySQL, PostgreSQL
- **Tools & Platforms** : Git & Github, VS Code, Fedora Linux
- **Soft Skills** : Problem-solving, Team collaboration, Time management, Adaptability

EXTRACURRICULAR ACTIVITIES

Hackathon Participant, Code Brisk(2023) - Developed a service marketplace website where users could register to offer services at their own prices, enabling customers to explore and choose from various options.
